

AGX FOCUS

Concentration Blend

Ingredients: Oils of Wintergreen Leaf, Grapefruit Peel, and Vetiver Root

Aromatic  Photosensitive 

Topical  Sensitive 

Since its inception, Améo has individualized itself by taking a unique, scientific approach to fully understand essential oils. We've leveraged this cutting-edge science and technology to create our Améo Gene Expression (AGX) database and, in turn, some of our most popular products. Then we took this same robust database and analyzed it in a completely different way; what we discovered is that there are six unique genetic zones. Each single Améo Essential Oil falls into a specific zone, and each zone's oils affect a particular body function. Essential oils that fall into AGX Zone 5 can promote concentration and focus, allowing individuals to center more easily.

BENEFITS

The essential oils found in AGX Zone 5—Wintergreen, Grapefruit, and Vetiver—allow the mind to stay on target throughout your busy day. Hone your focus with the calming and balancing properties contained in the essential oils in the AGX Focus blend. Whether you need a boost of confidence to get a project completed or simply want to mentally center after a long day, AGX Focus can help provide the concentration you need to reach your most ambitious goals.

SUGGESTED USES

- Diffuse AGX Focus in an Améo diffuser to promote concentration and provide an uplifting aroma
- Massage a few drops of AGX Focus behind the ears to calm the mind and body in times of chaos
- Apply 1-2 drops of AGX Focus to the wrists and inhale deeply to improve focus
- Apply a few drops of AGX Focus to the back of the neck to calm and center the mind
