

CORE MORINGA® XM3®

EXTREME MORINGA CAPS

Core Moringa's® XM3® utilizes cutting-edge science and the best herbs that nature has to offer. XM3®, when combined with exercise, targets the acceleration of the metabolism. Accelerating metabolism can help with calorie expenditure, increases focus and alertness, and helps suppress appetite.

XM3's® ingredients were picked with weight management and the acceleration of the metabolism in mind; helping you have sustained energy and burn calories long after your workout.

KEY BENEFITS

- Made from natural, beneficial herbs
- Helps to suppress appetite
- Provides focus and energy throughout the day
- Enhances thermogenic and resting metabolic effects

KEY INGREDIENTS

- Green Tea: Scientists have demonstrated that consumption of green tea combined with regular exercise results in decreased body fat, smaller waist circumference, and increased lean body mass and muscle strength. Additionally, research has shown that fat loss was sustained two weeks after discontinued use. One of the most challenging aspects of weight management is keeping the weight off after reaching your goal. Green Tea helps provide the needed management.
- Natural Caffeine: Known for centuries to temporarily sharpen focus and improve energy levels, caffeine may also have a place as part of a complete weight management regimen. Caffeine — when combined with green tea—has been clinically proven to trigger weight loss through enhancing thermogenesis and fat oxidation.

DID YOU KNOW?

- Evidence suggests that Korean ginseng decreases body weight, adipose tissue (loose connective tissue composed of adipocytes that specializes in the storage of fats), adipocyte size, increases thermogenesis and lipolysis, and positively affects lipid profiles. Korean ginseng works at the cellular level helping you reach your weight goals.
- KinetiQ™ is a clinically studied extract of Citrus aurantium (Bitter Orange). It is a non-stimulant energy enhancer. In a recent clinical study involving male subjects ages 18-22 using KinetiQ while following an intense weight training protocol, it demonstrated enhanced sports and resistance training performance.
- BioPerine is a patented and studied extract from black pepper that greatly enhances nutrient bioavailability and absorption.
