

CORE MORINGA™ XMburn®

XMburn works to temporarily increase metabolism, suppress appetite and help you make smarter food choices to lose unwanted pounds and maintain a healthier weight.

When we consume calories, our body has two options: (1) Burn those calories into energy; (2) Convert those calories into fatty acids that are stored in our adipose cells as fat.

Because of the sedentary lifestyle that many of us live, our metabolism is low. This means that our body decides to store a higher percentage of consumed calories as fat rather than burning them. Although an individual may be eating very few calories, those calories are still prone to be stored rather than burned, resulting in an increased weight and body fat percentage.

While XMburn has been shown to increase metabolism, this increase is temporary and is best achieved with an overall increase in basal metabolic rate. Coupling XMburn with strenuous exercise will help individuals achieve a more effective and permanent increased metabolism.

Supplement Facts

30 Servings Per Container

Serving Size

2 Capsules

% DV *	Amount Per 1 Serving
75 %	Niacinamide (Vitamin B3) 15mg
883 %	Methylcobalamin (Vitamin B12) 50 µg
0 %	Calcium (as DiCalcium Phosphate) 14mg
